

UAZ

SINCE 1941

UAZ PATRIOT

CREATED FOR EMOTIONS.
RESTYLED FOR THE ENTIRE FAMILY.

SPRIT OF FREEDOM...

CITY

Small lanes and broad avenues, traffic jams and inexperienced drivers, complicated parking at shopping malls and unexpected maneuvers on the road, no matter what tests a city has in store for you, your UAZ Patriot will always be at its best.

TRACK

When driving your UAZ Patriot, your longest trip becomes an enchanting comfortable voyage through the most picturesque locations of the country.

AND ADVENTURES

OFF-ROAD

The condition of the dirt road greatly affects its passability, and to a great extent the weather conditions as well. However, for the UAZ Patriot, none of this matters, it will take you to your destination—no matter what.

HEAVY OFF-ROAD

Off-road driving is often a memorable adventure, but not every vehicle can handle this. The UAZ Patriot is a famous off-road conqueror. With it, you can always be confident in your abilities.

FREEDOM OF CHOICE

SPACIOUS LUGGAGE COMPARTMENT

The restyled UAZ Patriot is designed for family trips to the most picturesque destinations, trips to the countryside for picnicking and village cottages for gardening. It goes without saying that for trips of this kind, one needs a lot of space to carry along tools, equipment and appliances. The UAZ Patriot luggage compartment is unbelievably spacious, and its configuration can be changed. Luggage compartment volume matters during city trips as well when driving to a park with a stroller and/or moving your stuff to a new apartment.

Genuinely spacious luggage compartment (volume to roof 1,130 l)

60:40 split bench seat

The volume reaches 2,415 l with the back seats folded completely

Luggage compartment shutter (volume to shutter 650 l)

INDIVIDUALITY

UAZ PATRIOT LEAVES NO ONE INDIFFERENT

The restyled UAZ Patriot is designed to provide its owner with memorable impressions of undertaken trips. Not only is the exterior important for everyone, but also what is on the inside as well. The restyled UAZ Patriot interior has become quite modern, well balanced and ergonomic. Thanks to the improvements, the vehicle provides comfort and positive emotions for everyone, driver and passengers, adults and kids alike.

STYLE

MODERN OFF-ROAD VEHICLE

UAZ Patriot is a large vehicle, favorably noticeable on the road, attracting attention with its stylish

LED daytime running lights. The restyled UAZ Patriot design has become more expressive and modern, thanks to a new radiator grill, and clear-cut lines that emphasize the confident character of a safe reliable vehicle.

New front radiator grill with chrome elements, and enlarged chrome UAZ logo on the hood

Rear view mirrors, in the color of the body, with integrated turn signal indicators

Headlamps with LED daytime running lights

Rear lamps with a dynamic contour

COMFORT

The interior space of the UAZ Patriot is designed to make being inside a pleasant experience. For this, the restyled UAZ Patriot comes with leather-upholstered seats, leather-wrapped steering wheel, gearshift and transfer knobs, and the parking brake lever.

COMFORT ALL OVER

Now everyone can appreciate the new interior of the restyled UAZ Patriot, with its leather-wrapped steering wheel as the key element. For more comfort and driving safety, new control functions have now been installed on the steering wheel. Also for comfortable driving, the vehicle is now equipped with new under-steering wheel switches of expanded functionality in a modern design.

10

Right under-steering wheel switch in the new design with windshield wiper pause control

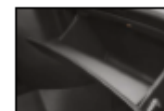

Second row seats with elbow-rests, are also equipped with two capacious cup-holders

Left under-steering wheel switch in the new design, with driving turn signal indicator mode and on-board computer control

Multi-functional steering wheel in the new design with cruise control and speed limiter, multimedia and loud speaker systems

Cooled glove box compartment with USB connector

UAZ

TRUST IN DRIVING

To ensure safe parking, the perfected UAZ Patriot comes with front sensors, in addition to the rear parking sensors, and the rearview camera's indexing lines have become dynamic. Thanks to this upgraded system, the modern UAZ Patriot is much easier to park in tight parking spaces.

When backing up a vehicle, a color display shows the view from the rear camera with dynamic indexing lines, and front and rear parking sensor signals

Front re-switchable parking sensors and fog lamps

Rear parking sensors on the bumper and rear view camera in the tailgate handle

The restyled UAZ Patriot is equipped with a modern 7-inch touch screen display, incorporated navigation and maps. Thanks to precise navigation and compass, the vehicle keeps on the correct route and reaches its destination. When driving, the multimedia system provides a positive atmosphere with music via USB, SD, or Bluetooth connections.

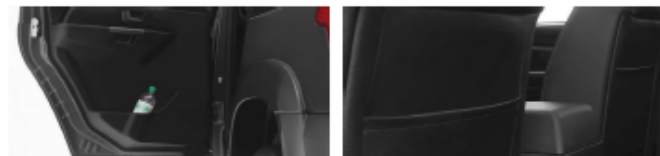

VOLUME AND SPACE

EVERYTHING REQUIRED IS AT HAND

When driving you may need a lot of things, so why limit yourself and take along less? The restyled UAZ Patriot combines spaciousness and comfort, and everything will find its place.

Central armrest is a convenient spacious 2-compartment box for use by the driver and front seat passenger

All doors are equipped with side pockets with a convenient niche

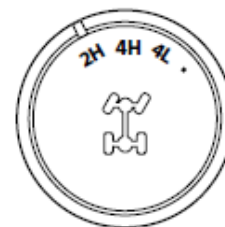

Pockets for rear seat passengers are located on the backrests of front seats

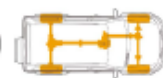

INDEPENDENCE

GENUINE ALL-WHEEL OFF-ROADER

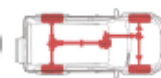

The restyled UAZ Patriot has preserved all the features of a first-class off-roader, which is able to reach the most rugged locations of the country, thanks to its unmatched geometric passability, solid frame design, high road clearance and connectible tight all-wheel lower gear range drive. Since 2016, the features include electronically controlled rear axle differential lock.

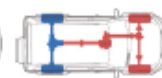

2H Rear-wheel drive
Motor torque is transmitted to the rear discs which saves fuel when driving on roads

4H All-wheel drive
Tightly connected all-wheel drive, brilliantly manages driving under complicated road and weather conditions

4L All-wheel drive and lower gear range
Lower gear input in the 2.542 transmission ratio gearbox, ideally suited for driving on the worst rugged terrains

4L+ Rear axle differential lock
Easton rear axle differential lock is intended for maximizing off-road drive qualities, and is switched on by a button in the salon

GENUINE ALL-WHEEL OFF-ROADER

UAZ Patriot is famous for its unsurpassed geometric passability. Along with high bumpers and steady high ground clearance to the axle case, it is important to know that the UAZ Patriot is a frame off-roader. Powerful spar frame protects the vehicle's body from bumps, torsion and tensile loads, experienced when driving on rough terrain, towing a heavy trailer and/or pulling out a stuck vehicle. This design allows for the stretching of resources under the roughest operating conditions.

FRAME DESIGN FEATURES :

1. Impact protection
2. Torsion protection
3. Tensile protection
4. Proportional load distribution
5. Vehicle resource extension

TRIMS

STANDARD

Driver and passenger air bags
Front seat safety belts with pretensioners
Electric heated side mirrors adjustment
Tilt and telescopic steering wheel adjustment
ABS and EBD systems

COMFORT

STANDARD +
16" alloy wheels
Air conditioner and cooled glove box
Rear parking sensors
Heated front seats
MP3/USB Audio system with 4 speakers

PRIVILEGE

COMFORT +
Kalahari 18" alloy wheels
7" touchscreen in-dash multimedia and navigation
Multi functional heated leather steering wheel
Rear view camera and front parking sensors
ESP, TCS, CBC, HHC, HBA systems and Off-road Mode

STYLE

PRIVILEGE +
Sahara 18" alloy wheel
Climate control
Leather seats
Heated rear seats
Heated windscreen

POWER AND CAPACITY

GASOLINE ENGINE

Thanks to a well-tested design, modest fuel consumption, and off-road endurance, the engine is highly reliable. Mounted on all models, the engine generates high torque at low rotation rates, which allows for reliable starts in off-road conditions, and comfort in the city.

DIESEL ENGINE

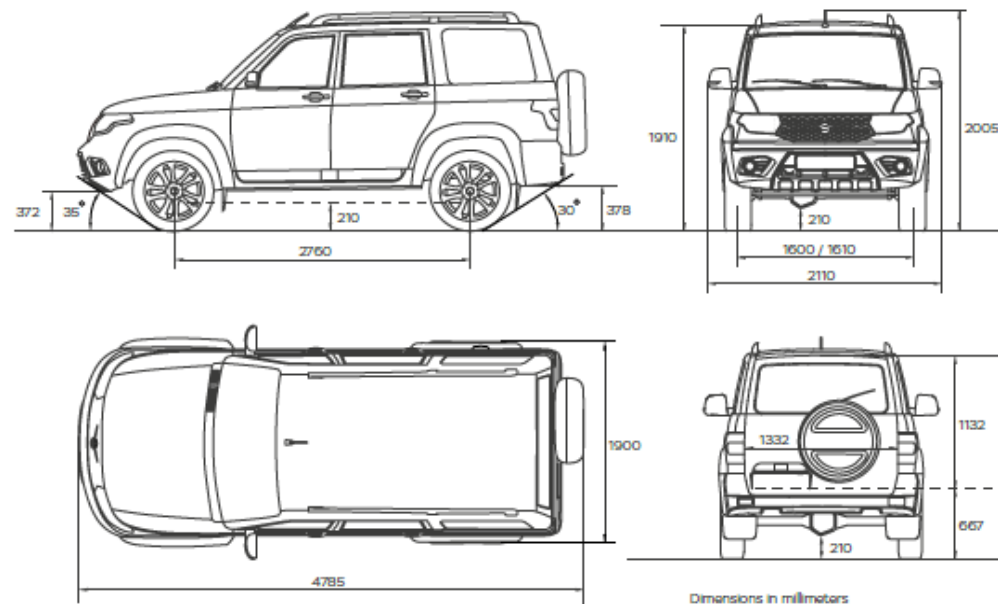

The diesel engine installed in the new UAZ Patriot was designed in collaboration with leading foreign engineering companies. It is equipped with BOSCH Common Rail and timing chain, which reduces servicing expenses.

ENGINE AND TRANSMISSION			
Engine type and model	ZMZ-40906	ZMZ-51432	
Fuel	92+ RON gasoline	Diesel fuel	
Engine displacement, l	2.693	2.235	
Maximum output, hp (kW)	134.6 (99.0) at 4,600 rpm	113.5 (83.5) at 3,500 rpm	
Maximum torque, Nm	217.0 at 3,900 rpm	270 at 1,300-2,800 rpm	
Wheel arrangement	4x4	4x4	
Gearbox	5-speed manual		
Transfer case	2-speed transfer case with electric drive (low gear working ratio i = 2.542)		
Drive type	Part time all wheel drive		
Emission Standard	EURO 5, EURO 6	EURO 5	
SPEED AND FUEL EFFICIENCY			
Maximum speed, km/h	150	135	
Urban cycle	14 l/100 km [71 km/l]	n/a	
Suburban cycle (at 90 km/h)	11.5 l/100 km [87 km/l]	9.5 l/100 km [10.5 km/l]	
Fuel tank capacity, l	68	68	

SPECIFICATIONS

DIMENSIONS AND WEIGHTS

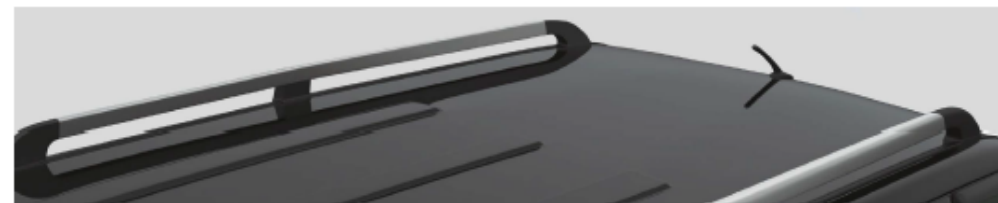

Seating capacity	5
Length, mm	4750 / 4785
Width (w/o mirrors), mm	1900
Width (w/mirrors), mm	2110
Height, mm	1910 / 2005
Wheelbase, mm	2760
Front/rear track, mm	1600 / 1610
Road clearance (to the axle case), mm	210
Fording depth, mm	500
Front/rear bumper height, mm	372 / 378
Angle of approach, degree	35
Angle of departure, degree	30
Luggage compartment volume VDA, l to shutter / to roof / with rear seats folded	650 / 1130 / 2415
Tailgate, height/width, mm	1132 / 1332
Tailgate ground clearance, mm	667
Curb weight petrol/diesel, kg	2125 / 2165
Gross weight petrol/diesel, kg	2650 / 2690
Payload, kg	525
SUSPENSION, BRAKES, TIRES	
Front/rear brakes	Disc type / drum
Front suspension	Dependent, spring with antisway bar
Rear suspension	Dependent, on two longitudinal semi-elliptic leaf springs, with transversal stability antisway bar
Tires	225 / 75 R16, 245 / 70 R16, 245 / 60 R18, 235/70 R16

ACCESSORIES

FEATURES OF ORIGINAL ACCESSORIES

Driver and passenger safety depends on the quality of the spare parts. Original accessories from the manufacturer fully comply with modern technical requirements, and their durability and reliability have been proven in practice. To order original accessories and spare parts, please visit the website parts.uz.ru

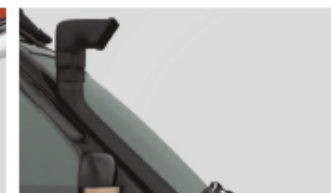

Roof rack options

Winch

Towing coupler

Snorkel

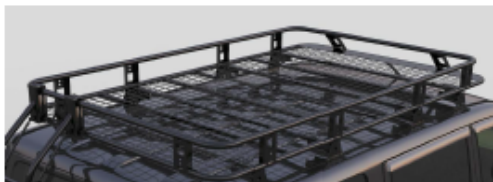

Access ladder

The adjustable ladder is mounted to the vehicle tail gate to allow a fast and easy access to the cargo. High quality coating makes its use convenient under extreme temperatures and weather conditions.

Cargo mat

A durable and lightweight cargo mat protects belongings, tools and other household items in the cargo space. The mat also protects the floor of the vehicle from fluids or wear and tear that may occur during transportation of cargo.

Expedition rack

A rock-solid and ultra-convenient rack accommodates all sorts of cargo to transport, such as a tent for a fishing trip or equipment for hunting. Eight mounting legs and durable fasteners provide a uniform load distribution and protection when driving over rough terrains. Dedicated positions for optional headlights, shovel and rack jack attachment are provided, no installation tools required. A steel mesh secures the load. The roof rack has a shock-resistant powder coating.

All-weather floor mats

All-weather floor mats serve several important functions: they protect the interior from dirt and moisture, are easy to clean and also protect the vehicle floor from rust and decay. The interior protection was specially designed to minimize mud and water flow along the surface of the mat, thus preventing a spillover. Regardless of which muddy path you may have walked, the mat will keep the vehicle interior dry and clean.

Fuel tank protection

The finned on the perimeter, 3 mm-thick impact-resistant steel skid plate protects the fuel tank from external damage.

Front bumper guard

The high quality durable steel under-ride protection bar is attached directly to the front bumper.

Engine and gearbox protection

The under-ride protection bar and ribbed under-shield protect the engine and steering mechanisms while you drive over rocky ground.

Side protection runners

The high-quality polished stainless steel side runners provide a reliable protection for the side thresholds from stumps, boulders and rocks.

SUCCESSFUL DEBUT AT DAKAR

UAZ PATRIOT showed outstanding results on Dakar 2015 which was held in South America. During its first participation in the prestigious transcontinental race UAZ successfully passed the whole distance of 14,000 km as an escort vehicle for one of the teams and coped with all difficulties of the route.

UAZ

FACTS ABOUT UAZ

1

The first electric vehicle by UAZ was developed in 1959. It was intended for operation in airfields. The electric vehicles operated on traction batteries split into 2 sections. The underfloor batteries were installed on both sides in special boxes.

2

Starting from 1970s, Martorelli brothers, who were the owners of the well-known Italian company Marbros, participated in races and autocrosses on UAZ vehicles. They had repeatedly become overall champions of Italy in various categories.

3

UAZ-469 was the first vehicle to climb up the Elbrus. In August 1974 during initial run three standard cars (without any winches or anti-skid chains) of UAZ-469 reached the glacier on Elbrus at the height of 4,000 meters.

4

In 1975 the Ulyanovsk SUV was the first of its class to participate in a motor rally through the Sahara Desert, followed by a rally through the Karakum Desert in 1979. The rally in the Karakum Desert proved that the soviet car is a modern vehicle, suitable for operation in various environmental and soil conditions.

5

In 1983 the Soviet Army put into service a unique floating UAZ-Jaguar car. Still in the world there is nothing like this car. The car was equipped with propelling screws, thanks to which the speed reached up to 10 km/h on water. The cars successfully passed the tests in harsh environmental conditions: the Pamir uplands, the Astrakhan's heat and the Arctic's cold.

6

In 2010 the UAZ company tested dynamics, structural strength, and passing ability of the Patriot Sport SUV at a military training area. Patriot Sport was competing with an armored fighting vehicle BTR-80. The car reached a speed of 40km/h and covered 200 meters in 18 seconds, securing a lead of 2 seconds.

7

In 2010, at the international Silk Way Rally, the UAZ Sport Division team became the best Russian SUV team.

8

In 2014 UAZ Patriot SUV accomplished an Arctic expedition. Over 21,000 km were covered in 38 days. The route comprised public-access roads, temporary winter roads, the frozen Tundra, and the ice of the Laptev Sea. The expedition started and finished in Krasnoyarsk.

9

In 2010 UAZ-469 set a new world record in the passenger car capacity. The SUV managed to accommodate 32 people. A regular bus has almost the same number of passenger seats. The total weight of the people with the driver amounted to 1,900 kg, which is equivalent to the weight of an African elephant.

A real SUV should adequately cope with any tests

Modern technological solutions and the latest equipment from the world's leading manufacturers guarantee you absolute passage, with the highest level of comfort and safety of our cars.

For 75 years, our SUVs have repeatedly confirmed their outstanding product quality in extreme climates and challenging road conditions.

Hundreds of thousands of kilometers in the steppes of Central Asia, the mountains of Transcaucasia, across the deserts of Africa and the expanses of the Far North, and finally, the victorious ascent to the highest mountain in Europe – Elbrus, all have allowed our cars to become a symbol of overcoming any obstacles in the harshest of conditions.

UAZ. A symbol of passage. A mark of excellence.
